

Phone Display Changes

Although your service is being transitioned to Alltel billing and network systems on July 29, in the coming weeks you may notice a change to the roam indicator on your wireless phone.

Currently your phone may display a roam indicator, such as “Preferred Midwest” or “Roaming” when traveling outside your home area. These roam indicators will change—they will be shown as either flashing or solid icons, such as “▲” or “R.”

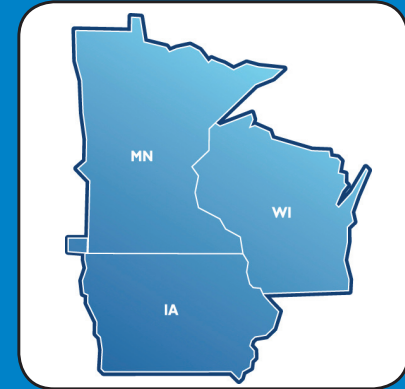

- Please be assured your rate plan coverage area and billing will NOT change—the roam indicators displayed on your phone will only look different.
- Charges for calls will continue to be based on your rate plan coverage area.

Mobile-to-Mobile

Great news! If you have the Mobile-to-Mobile feature, your coverage area will expand beginning July 29. Your Mobile-to-Mobile coverage will increase from your Midwest Wireless network calling area to include calls to and from all Alltel customers while in your rate plan coverage area.

If you have questions regarding this information, please call 1-800-545-3950.
